## SOLUTION FOR YOUR *Stray Metal Contamination Problem*

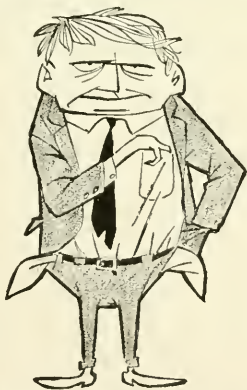

**S**TRAY metal contamination is more of a problem than is generally realized—this has been proven in all of the plants where the METAL DETECTOR has been installed. The ELECTRONIC METAL DETECTOR removes those contaminated products. Many times, the recovered metal can be traced to its source—thereby eliminating the cause of contamination. The METAL DETECTOR can easily be adapted to production lines for *automatic* rejection of contaminated material—requires

no additional personnel at the line.

BRILMAYER ELECTRONIC METAL DETECTORS are *custom made* to fit your specific needs.
